

STAR COMPUTERS - DESKTOPS

EXPLORER XL

- SMALL STATURE**
- CELERON / PENTIUM 4**
- LOW PRICE**

The Explorer XL is one of the smallest, most powerful and most expandable machines you can get. With more bays than most mATX cases, you have the power to upgrade in the future.

Small Stature

The small form factor design is perfect for places with limited desk space. The Explorer XL is perfect for any situation.

Processor Options

When you want a fast machine but don't want to pay the price for the newest technology, the Intel Celeron processor is what you need. The Celeron processor was designed for the cost conscious consumer, while maintaining speed and reliability at a fraction of the cost. If you want speed, performance, and the best compatibility then look no further than the Pentium 4 processor. This processor was designed for the power user who likes to multitask without slowing down.

Low Price

The Explorer XL is a best buy. With a base price under \$500, this system is sure to please. The Explorer XL also allows for processor, memory, and optical drive upgrades.

Special Features:

- **Front USB 2.0**
- **Air duct design for High speed processor**
- **Support for Intel Pentium 4 Processor up to 3.06G**
- **Tool-less peripheral attachment**
- **Tool-less cover removal for easy service and upgrades**

STAR COMPUTERS - DESKTOPS

Explorer XL

With Celeron or Pentium 4 Processors

The Explorer XL is our smallest and most economical Celeron/Pentium 4 computer in the Star lineup. While utilizing the new 478 Pin Celeron or Pentium 4, it economizes by using a Micro ATX Chassis.
