

STAR COMPUTERS - DESKTOPS

NOVA XL

- SMALL FOOTPRINT
- CELERON / PENTIUM 4
- LOW PRICE

The Nova XL features everything you need in a stylish black and silver chassis. The Nova XL is powered by Intel's powerful Celeron or Pentium 4 processor.

Small Footprint

Being able to use this system stood up like a tower or under the monitor as a desktop provides more options than a standard case. The small form factor design is perfect for places with limited desk space. The NOVA is perfect for any situation.

Processor Options

When you want a fast machine but don't want to pay the price for the newest technology, the Intel Celeron processor is what you need. The Celeron processor was designed for the cost conscious consumer, while maintaining speed and reliability at a fraction of the cost. If you want speed, performance, and the best compatibility then look no further than the Pentium 4 processor. This processor was designed for the power user who likes to multitask without slowing down.

Low Price

The Nova XL is a best buy. With a base price of under \$500 retail, this system is sure to please. This system also allows for processor, memory, and optical drive upgrades.
